

2.3.8.2 Language-related features in Cases

The **Add/Edit Case** page features an **Exhibit Language** drop-down list, which lists all the available languages in the Item Bank. The first language in the Item Bank configuration is selected by default. This language cannot be changed once assigned to the item during its creation except via Batch Edit by the Project Manager. The **Exhibit Language** drop-down list is unavailable if no languages are specified in the Item Bank configuration.

The screenshot shows the 'Add/Edit Case' interface for the 'Vikys Project'. The page includes a navigation bar with options like 'Develop Questions', 'Prepare Assets', 'Create Exam Form', 'Manage', 'Observe', 'Manage Item Bank', and 'View Item Bank'. A secondary bar contains 'Write Item', 'Review', 'Validate', and 'Cases'. The user is identified as 'Welcome edvturner (Last Login: 03/05/19 11:03 AM)' with links for 'Home', 'Tasks', and 'Logout'. On the left, there are buttons for 'Add Case' and 'View Cases'. The main form area has a title 'Add/Edit Case' and a 'Project: Vikys Project' label. It contains a 'Case name' text field, an 'Exhibit ID: Not saved' label, and an 'Exhibit language' dropdown menu currently set to 'English', which is highlighted with a red circle. Below this is an 'Exhibit text' text area. A 'Select Questions' section follows, with the heading 'Provide your search Criteria (Refresh for Count)'. It features a search filter: 'Question ID' dropdown, a checkbox for 'Not', and 'is equal to' dropdown, followed by an empty search input field with a red 'X' icon. There are buttons for 'Add New Criteria', 'Retrieve Questions', 'Save Search', and 'Load Search'. A note states: 'This project is configured to allow observers to see all of the questions. Draft and obsolete questions are not shown.' At the bottom, there is a 'Write Question' button and a row of buttons: 'Save All', 'Preview', 'Submit All', and 'Exit'.

The items, which can be added to the case, must be authored in the same language as the case. The search results from the **Select Questions** page therefore yield only items with the same language in the result. If you try to search for different language versions of items, then an error message in red text is displayed with no search results.

Write Case Question Project: Vikys Project Help

You can write Questions to add to the current Case. Click 'Save Question' button to save the current Question in the Draft state to the Case. The 'Finish Case' button adds the current Question to the Case and moves it directly to the next state as per the Project configuration (Review/Validate/Completed). It will not affect Questions that are already in the Review state. To discard the incomplete Question and return to the Add/Edit Case page, click 'Return to Case' button and then 'OK' in the resulting popup window. Also, click 'Cancel' in the resulting popup window to return to the Write Case Question page with the incomplete Question.

Question Type: MCQ, One Correct Option Question Number : Unsavd Language: English Weight : Default
