

4.1.11.3.4 Qti Metadata tab

The **Qti Metadata** tab can be accessed by clicking an ExamForm node on the **Delivery Configuration Tool** page and then clicking the **Qti Metadata** tab in the right pane.

The screenshot shows the 'ExamForm' configuration interface. On the left, a tree view shows 'Exam - 1' expanded to 'ExamForm - 123'. The main area has tabs for 'Global Configuration', 'Item Metadata', 'Exam Metadata', and 'Qti Metadata'. The 'Qti Metadata' tab is active, showing a list of metadata fields with input boxes and red minus icons for deletion. The fields are: Language (English), duration, min_adjusted_duration, max_adjusted_duration, duration_adjustment_ratio, and form_item_count. At the top, there are fields for Ident (123), Title, Version (1.0.0.0), and Resource Container (+).

You can create, edit, or delete any metadata field items here. On exporting, these values are listed under the *qtimetadata* tag in *Assessment.xml*.

Entering values in the already present metadata field items produce the results as shown below:

This close-up screenshot shows the 'Qti Metadata' tab with the following values entered in the fields:

Field Name	Value
Language	English
duration	PT10M
min_adjusted_duration	5
max_adjusted_duration	15
duration_adjustment_ratio	0.5
form_item_count	18

The resultant fields in the *Itempool.xml* file are as shown below:

Add a metadata field item

To add a metadata field item, you must specify the **FieldLabel** and **FieldEntry** values in the respective text boxes and click **Add**.

The image shows two screenshots of a metadata configuration interface. The top screenshot displays the 'Add' button circled in red. A red arrow points from the 'Add' button to the bottom screenshot. The bottom screenshot shows a list of metadata fields, with the 'TestFieldLabel' entry circled in red.

Delete a metadata field item

To delete a metadata field item, click the  **Remove Option** icon corresponding to it. A warning pop-up is displayed to confirm the deletion.

The image shows a warning dialog box with the text: "The page at ed says: This will delete the item. Are you sure?" and buttons for "OK" and "Cancel".

- **OK** button: Delete the metadata field item and return to the previous page.
- **Cancel** button: Do not delete the metadata field item and return to the previous page.

Edit a metadata field item

Only the FieldEntry field of the metadata field item can be edited directly via its textbox. FieldLabel once entered, cannot be edited.
